Note: These fees are the amounts we bill your insurance company for services, but not necessarily the amount we actually receive from them. We are contracted to accept the amount each insurance carrier deems is the “usual and customary” dollar amount for the regional area we practice in. It is illegal to offer a different “cash rate” to patients without health insurance, therefore these are also the “cash rates” for those without health insurance. We do offer payment plans. Ask us for more information.

Effective September 1, 2015
